

Some Indian Initiatives towards Managing Climate Change Impacts

Gurdeep Singh and Prasoon Kumar Singh

Abstract

Climate change is one of the most talked about global phenomena that has been impacting both developed and developing countries in terms of sustainable development besides others. India as a signatory to the United Nations Framework Convention on Climate Change, has been attempting to manage various challenges of climate change through several mission programs and through climate change education. This article discusses various national missions as well as the efforts of the Indian School of Mines as a leading institution of the country towards managing the impacts of climate change in India.

Keywords: Climate Change, global phenomena, Environment, green house gases, adaptation, sustainable development, India's action plan
